& Professional Hearing Management**

PLEASE SIGN UP FOR OUR PATIENT PORTAL!

What is a Patient Portal?

A patient portal is a secure online website that gives you convenient 24 hour access to your personal health information and medical records from anywhere with an Internet connection.

Why is Using the Patient Portal Important?

Accessing your personal medical records through a patient portal can help you be more actively involved in your own health care. Also, patient portal access offers self service options that can eliminate phone tag with your doctor. Patient Portals also cut down on your wait time in office registration as you can update your own information, and need to call the office as you can access much of your information through the Portal.

What Can I Do With a Patient Portal?

You can securely view and print portions of your medical record, including recent doctor visits, discharge summaries, medications, immunizations, allergies, and most lab results anywhere you have lab access.

Other features include:

- Exchanging secure e-mail with health care team
- Requesting prescription refills
- Checking your benefits, coverage and account balance
- Updating your contact and insurance information
- Downloading or completing intake forms

How Do I Access the Patient Portal?

When you check in for your appointment today, please verify your current email address and indicate that you would like portal access. We will then email you a secure link for immediate access. Your email address is secure and will not be shared. Please ask anyone on our staff if you have additional questions.
